

EMAIL POLICY

Responsible Officer Contact Officer	Director of IT at UNSW
--	------------------------

1. Preamble

The University of New South Wales has recognised that electronic mail has become a major means of communication within the University community, acknowledging its benefits, the University makes electronic mail facilities available to all members of the community and is moving to make electronic mail the primary means of communication for a large proportion of official University communications.

If used appropriately, electronic mail has the potential to offer the following benefits to the University and members of its community:

Encouragement of team working for teaching, research and administration.

A more cost-effective, timely and environmentally friendly means for the University to communicate and disseminate information, day-to-day.

Fostering collaboration across national and international boundaries.

A method of communication which encourages the formation of a cohesive university community over geographically dispersed sites.

That UNSW will meet the expectations of potential students with regard to the services provided by a university in a competitive international environment / market.

A convenient means for business transaction record-keeping.

Ease of establishing two-way communication with teaching staff.

Enhanced access to teaching and research materials for some users with disabilities (in particular hearing-impaired users), who benefit from increasing amounts of materials in written form.

Another means of social interaction for all students and staff, which contributes to the completeness of the UNSW experience.

UNSW is also aware of the risks associated with electronic mail which include:

The difficulty of providing access to suitably equipped computers for students.

The increased difficulty in controlling record-keeping and legal liability issues.

The awareness that email is not a secure form of communication, and that privacy and confidentiality are not guaranteed.

That electronic mail may be used to deliver material inappropriate to a University context.

The problems related to information overload, inevitable when large quantities of information, some of which is of marginal value, is delivered to individuals.

That the implementation of email may result in further barriers for users with disabilities, in particular where the users may require additional technologies in order to make the most effective use of email.

Overall, UNSW considers electronic mail a positive resource for the University and will work to encourage its implementation and use.

Policy for making a complaint or reporting incidents of criminal, corrupt conduct or maladministration or Protected Disclosure at UNSW.
