

# Safety Alert September 2023

**Subject: General Lithium-Ion (Li-ion) battery Safety**

Li-ion batteries are commonly used in various devices like laptops, smartphones, electric vehicles, and more. At UNSW, safety with these batteries is crucial. This alert offers simple guidelines for safe Li

- For large personal batteries, such as for e-bikes and e-scooters, these **MUST NOT** be charged in offices or indoor areas. For security reasons they can be stored in a secured environment but
